Profile

Data Engineer with 7 years of experience designing and delivering scalable data pipelines, ETL workflows, and cloud-native solutions. Utilized technologies like **Python, SQL, PySpark, Glue, Lambda, S3 and Lake Formation** to process millions of files daily while ensuring secure, fine-grained data access for scientific and operational teams.

Skills

Languages: Python, Java, SQL

AWS Services: S3, Lambda, Glue, Batch, Step Functions, IAM, Secrets Manager, OpenSearch/ElasticSearch, Athena, CloudFront, EC2, ECS, ECR, Lake Formation, RAM, Layers, CloudFormation, API Gateway, Redshift Spectrum, RDS Aurora, DynamoDB, CloudWatch, SES, SNS, SQS

DevOps & Tools: Jenkins, Git, Postman, Jira, Confluence, Docker, GitHub Copilot, GenAI

Concepts: ETL/ELT, Data Pipelines, Orchestration, Microservices, Access Control, Data Governance, Infrastructure as Code, Serverless, Multi Processing

Frameworks/Tech: FastAPI, Angular, Marquez Lineage

Experience

Thermo Fisher Scientific

04/2022 – Present | Bengaluru

Software Engineer II

Tech Stack: AWS, Python, PySpark, SQL, Java

- **Designed, built, and documented** 10+ **AWS-native data pipelines** (Lambda, Step Functions, S3, Glue/PySpark), handling high-volume file ingestion and transformation at scale.
- **Developed** user-facing **data lake workflows** and Python/Java **microservices** for dataset creation, sharing, and custom metric dashboards, enabling scientists to access insights quickly.
- **Implemented** fine-grained access control with **Lake Formation**, including LF Tag permissions, cross-account sharing, and dynamic grants from Aurora/OpenSearch.
- **Managed** data batches using AWS Batch on **Fargate** with optimized vCPU/memory and **ECR** containers for 100K+ files per run, set up deployment pipelines with **Jenkins**, and provisioned infrastructure with **CloudFormation**.
- **Orchestrated** ML inference pipelines for feature extraction, ensembling, and S3 storage, **integrated GenAI (RAG-based)** for natural language to SQL generation using backend schema context, and reduced query latency by ~70% by caching STS credentials in **DynamoDB**.
- **Integrated OpenSearch** and **Marquez Lineage** to track metadata and transformation paths across pipelines, enabling fast lookups and simpler debugging.
- **Automated** S3 memory threshold and pipeline status alerts with **Lambda** and **SES**, tuned log retention, memory, and timeouts to achieve ~60% cost savings across 50+ Lambda functions.
- **Led** mentoring of junior developers, collaborated with scientists, and facilitated stakeholder meetings to align on pipeline requirements and delivery schedules.

Teligenz Tech Solutions

08/2018 – 03/2022 | Bengaluru

Software Engineer

Tech Stack: Java, Python, AWS, Spring Boot, Hibernate, REST APIs, GitLab

- Designed and modularized backend architecture for a stock trading platform used by brokers and investors.
- Developed RESTful services for web and mobile applications using Spring Boot and Hibernate.
- **Built ETL workflows** to extract stock trade and order data, perform transformations, and store insights in structured formats (CSV/Parquet) in **AWS S3** for reporting.
- **Automated** deployment pipelines and configurations using GitLab, deployed and managed services in **AWS EC2**.
- **Mentored** junior developers and contributed to architecture decisions during early-stage product development.

Accomplishments

Udemy - AWS Certified Data Engineer Associate 2025 - Hands On 📄

Inditrade Insight - Trading Recommendations System

PySpark, Python, PostgreSQL, OpenSearch, MinIO (S3 Compatible), Docker, Streamlit, Machine Learning, yfinance

A web app for a stock recommendation system that processes historical market data from NSE, computes technical indicators, trains ML models, and generates trading recommendations.

Favourite Songs Dashboard

Python, FastAPI, React, Redis, Spotify/YouTube/Songlink API, Docker

A web app that aggregates most played and liked songs from multiple music platforms (Spotify, YouTube) into a single interface and enables playlist migration.

Portfolio Website

React, GitHub Pages, Google Analytics

Portfolio Website showcasing skills and ongoing and completed projects. Integrated with Google Analytics to track website traffic.

Education

B.E. in Computer Science

07/2013 – 07/2017 | Tumkur, Karnataka

Shridevi Institute of Engineering and Technology
